Skills

Interaction Design
User Interface Design
User Experience Design
HTML
CSS
User Research
Personas
Wireframes
Prototyping
Sketching
Problem Solving

Education

University of Ulster
Interaction Design
2018 - present

Year 1 Classification | First Class Honours

Modules:

Fundamentals of Interaction Design, Designing with Content, Exploring Identity, Image and Data Visualisation, Communication Design.

Experience

Jungle Venture | Childrens Travel App

A travel app designed for children in which they can navigate through the rainforest and learn about their favourite animals. I developed my sketching, user research, wireframe, prototyping, user interface and experience design skills when working on this project.

Branding |Creating my own brand

I created a website, monogram, wordmark, visual marque and business cards to create and develop my own brand. I learnt how to build a website using HTML and CSS, the wireframes and mockup designs of my website helped assist me when doing this.

Acheivements

Across all my modules in my 1st year of studying Interaction Design I achieved above 70%.

I was selected to go to Bangalore, India in summer 2019 with University of Ulster.

I play hockey for the first XI at Ballyclare Ladies and played for the first XI at Ballyclare Secondary School.

More about me

I am an outgoing, talkative, innovative individual who loves volunteering to work with children & young people. I strive to learn more everyday. When I'm not building for the future you can find me playing hockey or eating ice-cream. I want to have new experiences and receive expert opinions to develop my skill set.
